Paul Tol's Colors

The following section includes palettes created Paul Tol. `typst-palettes` only package his work for ease-of-use in Typst.

Tol's Bright — `tol-bright`

Bright qualitative colour scheme that is colour-blind safe. The main scheme for lines and their labels.

blue		cyan		green		yellow	
rgb	#4477aa	rgb	#66ccee	rgb	#228833	rgb	#ccbb44

red		purple		grey	
rgb	#ee6677	rgb	#aa3377	rgb	#bbbbbb

Tol's High-contrast — `tol-high-contrast`

High-contrast qualitative colour scheme, an alternative to the bright scheme of Fig. 1 that is colour-blind safe and optimized for contrast. The samples underneath are shades of grey with the same luminance; this scheme also works well for people with monochrome vision and in a monochrome printout.

white		yellow		red		blue	
rgb	#ffffff	rgb	#ddaa33	rgb	#bb5566	rgb	#004488

black	
rgb	#000000

Tol's Vibrant — `tol-vibrant`

Vibrant qualitative colour scheme, an alternative to the bright scheme of Fig. 1 that is equally colour-blind safe. It has been designed for data visualization framework TensorBoard, built around their signature orange FF7043. That colour has been replaced here to make it print-friendly.

blue		cyan		teal		orange	
rgb	#0077bb	rgb	#33bbee	rgb	#009988	rgb	#ee7733

red		magenta		grey	
rgb	#cc3311	rgb	#ee3377	rgb	#bbbbbb

Tol's Muted — `tol-muted`

Muted qualitative colour scheme, an alternative to the bright scheme of Fig. 1 that is equally colour-blind safe with more colours, but lacking a clear red or medium blue. Pale grey is meant for bad data in maps.

indigo		cyan		teal		green	
rgb	#332288	rgb	#88ccee	rgb	#44aa99	rgb	#117733

olive		sand		rose		wine	
rgb	#999933	rgb	#ddcc77	rgb	#cc6677	rgb	#882255

purple		pale-grey	
rgb	#aa4499	rgb	#dddddd

Tol's Medium-contrast — `tol-medium-contrast`

Medium-contrast qualitative colour scheme, an alternative to the high-contrast scheme of Fig. 2 that is colour-blind safe with more colours. It is also optimized for contrast to work in a monochrome printout, but the differences are inevitably smaller. It is designed for situations needing colour pairs, shown by the three rectangles, with the lower half in the greyscale equivalent.

white		light-yellow		light-red	
rgb	#ffffff	rgb	#eecc66	rgb	#ee99aa

light-blue		dark-yellow		dark-red	
rgb	#6699cc	rgb	#997700	rgb	#994455

dark-blue		black	
rgb	#004488	rgb	#000000

Tol's Light — `tol-light`

Light qualitative colour scheme that is reasonably distinct in both normal and colour-blind vision. It was designed to fill labelled cells with more and lighter colours than contained in the bright scheme of Fig. 1, using more distinct colours than that in the pale scheme of Fig. 6 (top), but keeping black labels clearly readable (see Fig. 10). However, it can also be used for general qualitative maps.

light-blue		light-cyan		mint	
rgb	#77aadd	rgb	#99ddff	rgb	#44bb99

pear		olive		light-yellow	
rgb	#bbcc33	rgb	#aaaa00	rgb	#eedd88

orange		pink		pale-grey

Seaborn

The following section shows qualitative palettes created by the seaborn project. `typst-palettes` only package his work for ease-of-use in Typst. Visit the seaborn documentation for a discussion of these palettes. All of these palettes come in a default 10-color and a reduced six color version.
